

TIRE MOUNTED TPMS SENSOR

030244

The Tire Mounted TPMS Sensor is mounted securely inside the vehicle tire using an automotive-approved VDA-compliant container, supporting automotive requirements for mechanical assembly and communication.

The TPMS sensor measures tire pressure and temperature directly on the tire and transmits the data regularly to the vehicle receiver.

SPECIFICATION

ITEM	DESCRIPTION
PART NUMBER	030244
PRESSURE RANGE	0-12 Bar
OPERATING TEMPERATURE	-40°C to +115°C
SPEED LIMIT	Up to 250 km/h (higher speed versions available on request)
LF-TRIGGER FREQUENCY:	125 kHz
FREQUENCY	433 MHz
TYPICAL BATTERY LIFETIME	5 Years
POWER SUPPLY	3V Battery
WEIGHT	9 g
DIMENSIONS	Diameter 25 x 12 mm
DATA TRANSMISSIONS	40-Second Interval
CUSTOMS TARIFF NUMBER	90262020
COUNTRY OF ORIGIN	Germany

SUITABLE FOR
**PASSENGER CARS, LIGHT, MEDIUM AND HEAVY DUTY
COMMERCIAL VEHICLES**
COMMUNICATION
RADIO FREQUENCY
